specifications of your diversion or storage works.) existing well, pump, pipeline to building		specifications of your diversion or storage works.) existing well, pump, pipeline to building
State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.		State manner in which water is to be diverted whether by dam or other works whether through nines disches firmes or other conduits
		State manner in which water is to be diverted, whether by dain of other works, whether through pipes, dictios, manes, of other constants.

9. Estimated cost of works. 10116-7-Well constituted and pumpting equipment installed under permit
10. Estimated time required to construct works
11. Estimated time required to complete the application to beneficial use three years
12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use. This application is a top filing on permit 26983. Additional cooling water is required for a proposed expanded manufacturing process. Present beneficial use was established at 68.5 million gallons per year for permits 26981, 26982 and 26983 combined. This application, together with the top filing for permits 26981 and 26982, requests an additional 31.5 million gallons (96.7 A.F.) per year appropriation from the ground water source. It is noted that no adverse quality deterioration occurs during the cooling process; therefore, the water is discharged to the Truckee River via the storm drainage system, i.e., the water is not consumptively used but returned to the system for reuse. The diversion rate request in item 12 is in addition to the 0.19 cfs (85 gpm) established in the Proof of Beneficial Use for permit 26983. See permits 26981, 26982, 26983 for map Applicant. Gering Products of place of use and points of diversion.

DENIAL OF STATE ENGINEER
This is to certify that I have examined the foregoing application, and do hereby/grant the same, subject to the
following limitations and conditions:
Application denied on the grounds that the appropriation of additional ground water as applied for would conflict with and tend to impair the value of existing rights and threaten to prove detrimental to the public interest and welfare.
The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and
not to exceedcubic feet per second
Actual construction work shall begin on or before
Proof of commencement of work shall be filed before
Work must be prosecuted with reasonable diligence and be completed on or before
Proof of completion of work shall be filed before
Application of water to beneficial use shall be made on or before
Proof of the application of water to beneficial use shall be filed on or before
Map in support of proof of beneficial use shall be filed on or before.
Commencement of work filed IN TESTIMONY WHEREOF, I. WILLIAM J. NEWMAN Completion of work filed State Engineer of Nevada, have hereunto set my hand and the seal of Proof of beneficial use filed my office, this 10th day of DECEMBER Cultural map filed.
